Sensitivity: Confidential

Martin,

Welcome back from Europe. I completed a global search and replace in the E4 report to change "frequency of smoking behavior" to simply "smoking behavior". I have notified the appropriate MDS team members about this as it may possibly change wording in a few tables, listings, or figures.

Robin contacted me yesterday regarding the handwriting on the report that was illegible. We were able to resolve all issues over the phone excluding the comments for pages 11, 44, and 52. As I understand Robin may be following up with you about these particular pages. I have a suspicion that the comments on page 44, may refer to the discrepancy in number of cigarettes smoked for inclusion into the light, medium, or heavy smoking categories. I did speak with Qiwei about this issue last week and believe we have now taken care of these comments protocol deviations section.

Kind regards, Cindy
